# Georgia Kriebel

+1 (412) 277 7433 | github.com/kriebelg | linkedin.com/in/georgia-kriebel | 35kriebelg@gmail.com

## Projects

**Ranking Application** | *Python, React, Supabase* June 2026 – Present

- Built and deployed a ranking platform as sole developer, owning the React frontend, Python backend, and Supabase schema
- Grew the platform to 25+ active users, with an App Store release currently in preparation

**Hardware Supply Chain Optimizer** | *Python, React, Graph Algorithms* March 2026 – Present

- Developed full-stack features at an early-stage startup using graph algorithms to optimize supply chain decisions
- Engineered a React frontend over a Python optimization backend to surface routing and sourcing results

**Rescue Pet Adoption Simulator** | *Java, Java Swing, Clean Architecture, Petfinder API* Sep 2025 – Dec 2025

- Built a Java Swing application promoting animal adoption via an immersive simulation and live data from the Petfinder API
- Applied Clean Architecture principles to maintain a decoupled, testable, and scalable codebase on a collaborative project

**Automated Geospatial Itinerary Planner** | *Python, Node.js, Flask, Gemini API, OpenRoute Service API* Oct 2025

- Leveraged the Google Gemini API to assist travelers in generating a personalized itinerary
- Integrated the OpenRoute Service API via Node.js and Python to process geospatial requests and calculate optimal travel paths

**Algorithmic Team Optimization Engine** | *Python, Pygame, Graph Theory* Feb 2025 – April 2025

- Developed Python algorithms utilizing Graph Theory to calculate statistically ideal team compositions
- Modeled attributes as a directed graph to optimize team compatibility, and created an interactive UI using the Pygame library

## Education

**University of Toronto**, Toronto ON, Canada August 2024 – Expected Graduation June 2028

Honors Computer Science and Physics Undergraduate (Focus in Scientific Computing) | Recipient of Warren Goldring Residence Scholarship

- Founder and President, University of Toronto Crochet Collective
- Co-Founder and Vice President, University of Toronto Matcha Club
- Web Developer, University of Toronto Robotics Association (UTRA)
- Member of UTQC (University of Toronto Quantum Computing); Volunteer for CSSU (Computer Science Student Union)

## Experience

**Barista and Customer Service**, Mic's Market (Pittsburgh, PA USA) | *Communication, Delegation* Summers 2025 & 2026

- Delivered efficient, friendly customer service under high-speed conditions, taking care of orders with accuracy

**Retail Customer Service**, The Sewickley Confectionery (Pittsburgh, PA USA) | *Perseverance* August 2022 – April 2023

- Managed payment processing, sales administrative tasks, and sales transactions

**Study Abroad: CIEE Japan Program**, Kyoto, Japan | *Leadership, Adaptability, Japanese* April 2023 – August 2023

- Completed a Japanese immersion program with a host family; assisted non-English speakers in Model UN conference settings

## Skills

- **Languages:** Python, Java, C, Assembly, JavaScript, TypeScript, R, SQL (PostgreSQL), HTML
- **Frameworks & Tools:** React, Node.js, Flask, Supabase, Java Swing, Pygame, Git, Linux
- **Hardware:** Arduino, VEX

## Highlighted Courses

**University of Toronto** Current

CSC263 (Data Structures & Analysis), CSC209 (Software Tools & Systems Programming), CSC311 (Intro to Machine Learning), CSC367 (Parallel Programming), CSC317 (Computer Graphics), CSC364 (Foundations of Computer Security)
